Skills

Node.js	MongoDB
TypeScript	Firebase
JavaScript	Supabase
React	C#
Next.js	HTML
NestJS	CSS
MySQL	SCSS

Interests
Gaming, walking in nature, festivals, technology

Profile
Software Engineer with a passion for modern web applications and scalable backend solutions. Eager to continuously learn, develop creative ideas and build innovative projects. In my free time I enjoy gaming, walking in nature and exploring new technology.

Experience

Software Engineer — Plugz B.V. (February 2024 - October 2025)
• Developing and maintaining features in a mobile application.
• Receiving and analyzing charging station failure reports using Node.js and Playwright; performing automated restart procedures and storing results in a database.
• Creating dashboards for visualizing reset and failure data.
• Assisting in the world's largest migration in the e-mobility sector.

Education

Software Development — Technovium (2021 - 2024)
Internship — Avisi
Platform for healthcare institutions to share knowledge and information among employees (Next.js, Node.js).
Build at Home — Collaboration with international schools
Platform for sharing ideas and projects (React, Node.js).

Referenties
